Letter Of Recommendation

To Whom It May Concern:

In 2001, my wife Esther and I decided to build the home of our dreams. We contacted a reputable architect in the local Malibu area and designed an amazing project, with nearly 16000 square feet and a substantial 12 car subterranean garage.

After years of permitting and challenges with the city of Malibu, we proceeded to locate the best contractors for this project. We interviewed many contractors, all of which promised a discounted construction and a no-worries process of building. We viewed many sample homes and reviewed and discussed the contract with countless people with experience in the home building and construction business.

Johnson and Hughes have now completed our home at 5700 Sea View Drive, after about two years of actual construction time.

This may seem like a long time, and it is. However, this home was built with extensive attention to details and quality. This is not our first project. However, we wholeheartedly feel that Johnson and Hughes have made all efforts to not only do a first rate job, but have done so with the best possible spirit of cooperation and fairness.

We do not suggest using Johnson and Hughes, if you're looking for the lowest cost, cheapest build or the fastest bang-it-out jobs. We do not suggest Johnson and Hughes, if you wish to build a low quality, spec product.

However, if you are a project principal, looking for a well made, quality home, Johnson and Hughes is your best bet. If you are looking for honest, principled gentlemen, with amazing experience and expertise, Johnson and Hughes comes highly recommended by us.

Please feel free to contact us for further details.

Sincerely,

Shary and Esther Nassimi
